PAGES 1 ENCLOSURES (NO. & TYPE) 1 - one sketch on ditto

REMARKS

25X1

1. There is an air force depot in the former German Artillery Equipment Depot located south of the Dallgow-Doeberitz road with this highway. (1) This installation has been used by the Russians since 1945 as a storage and shipping center for in-line and radial engines repaired at a repair installation at the Doeberitz airfield, and jet engines repaired by soldiers quartered in the former NSKK Kaserne at this field. (2) Bombs about 120 cm long and 25 cm in diameter were also last observed being shipped from the installation on 1 March 1952. The trucks carrying these bombs carried a red flag. (3)

2. Loading operations observed at the installation included:

25X1 21 June. [redacted] a crate 1.5x3x2 meters in front of building No 8 at 1:45 p.m.

22 June. Thirty-four crates of the same type as observed on the previous day were seen in front of building No 8 at 11:45 a.m.

23 June. The crates observed on 22 June were being taken into building No 8.

25X1 26 June. Twenty-nine crates painted grey and black left the installation and were loaded on 10 flatcars at the Dallgow-Doeberitz railroad station between 10 a.m. and noon. All the crates were fitted with a small window at one side.

25X1

Comments.

(1) For layout sketch of the Dallgow air force depot, see Annex 1. The sketch is incomplete, since only the buildings remembered by source were entered in it.

(2) Information on a unit quartered at the former NSKK Kaserne and engaged in repair work on jet engines at Doeberitz airfield was previously forwarded. [redacted]

25X1

(3) [redacted] The bombs were probably 100-kg bombs.

(4) From the dimensions of these crates it is believed that they were used for shipping RD-45 type jet engines.
